

Quiz 2

Question 1: Interactive Quiz with Score Tracking Build an interactive quiz application using HTML, CSS, and JavaScript.

The quiz should have the following features:

1. Questions and Options: Create an array of questions, each with multiple-choice options. Display one question at a time.
2. User Interaction: Allow the user to select an option for each question. Provide a "Next" button to move to the next question.
3. Score Tracking: Keep track of the user's score. Assign points for correct answers.
4. Final Score Display: After the user completes the quiz, display their final score.
5. Restart Option: Provide a button to restart the quiz, allowing the user to try again.

Remember to use proper HTML for structuring, CSS for styling, and JavaScript for interactivity. Feel free to customize the quiz content and design to make it engaging.

Note:

Submit the quiz through Moodle.

Submit all files and a screenshot of the output as well.
